Comment: Hydro One buying Avista.

This is an incredibly bad idea. Hydro one is using this purchase to offset carbon credits and the net results to Idaho energy consumers will be drastically high electrical bills. Do not allow this purchase to go through.

I am writing to express my strong opposition to the sale of our energy company Avista to another corporation in a foreign country.

Why should we allow a foreign owned corporation have control over our natural resources? I do not recall the specifics, but there now is serious concerns about Russia having significant ownership of our uranium supply in the United States. This was the result of a Canadian sale if I recall correctly.

I urge the Idaho Public Utilities Commission to strongly oppose the sale of Avista to any foreign entity.
